## Patient Ceiling Lifts Improve the Healthcare Environment

Learning Units: 1 AIACES20171

Credit Designation: LU/HSW

Format: Speaker led, Face to Face

Provider: Guldmann #404108332

This course provides insight toward the design and integration of patient ceiling lift systems in healthcare environments and their role in limiting physical stress of caregivers and encouraging safe physical activity for patients and staff. Knowledge of patient ceiling lift technology options will inform architects and designers' decisions, resulting in additional value

### Learning Objectives

- \* Discuss the design and integration of patient ceiling lift systems in healthcare environments to align with WELL Building Standards which encourage safe physical activity and limit physical stress
- \* Choose patient ceiling lift system design and features to match healthcare client's project
- \* Recognize the capability of patient ceiling lift systems to blend into the interior design plan of healthcare environment
- \* Differentiate between current & advanced patient ceiling lift technology options & features to aid client in value selection
